This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE.

THIS atlas is intended to serve as a companion to the 'Student's History of England.' My original intention was to select such of the maps in the 'Public Schools Historical Atlas,' edited by Mr. Colbeck, as more strictly concerned English history. It soon, however, appeared that more needed to be done. In the first place many additional maps were required to make the atlas satisfactory, and in the second place many of the maps there published appeared to me to require correction. Most of the maps now given are, however, taken from that source, though they have received more or less alteration. I have especially to thank Mr. James Gairdner for recasting his map of France in 1429 (No. 17). On all matters relating to the Welsh border I have been guided by the advice of Professor Tout, and in the plans of the Battles of Bannockburn, Creçy and Agincourt, by that of Mr. J. E. Morris, of Bedford Grammar School. In the case of Bannockburn, I have been helped by the map in Sir R. E. Maxwell's 'Robert the Bruce,' and in that of Agincourt, by the one in Sir James Ramsay's 'Lancaster and York.'

With regard to the maps borrowed with the permission of the proprietors from other sources, I have to thank the Society for Promoting Christian Knowledge, for 'England in 550' (No. 3), taken from Mr. Grant Allen's 'Saxon Britain;' and the Delegates of the Oxford University Press, for 'England in 1065' (No. 9), and 'The Battle of Senlac' (No. 67), taken from Professor Freeman's 'History of the Norman Conquest,' with some alterations. In the former some alterations have been made at the author's suggestion, and in the latter some details have been omitted as unsuitable for a school atlas. It is also by permission of the Delegates I have been able to insert 'The Battle of Poictiers' (No. 70), from Mr. E. M. Thompson's edition of 'Le Baker's Chronicle,' though I have thought it best to omit the preliminary movements of the English army as making the map unnecessarily complicated for my purpose. I have also to thank Messrs. Macmillan and Co. for leave to use 'England after the Treaty of Wedmore' (No. 7), from Green's 'History

87230

of the English People,' and 'England and France, July 1185' (No. 11), founded on a map in Miss K. Norgate's 'England under the Angevin Kings.' Two of the maps of Ireland (Nos. 21 and 24) are taken with the permission of the author from Mr. Bagwell's 'Ireland under the Tudors;' 'England and Wales, 1485–1603' (No. 20), with a few additions, from Mr. Moberly's 'Early Tudors;' 'Central Britain, 1715-1745,' with the addition of Prince Charles Edward's route, from Morris's 'Early Hanoverians.' For the plans of the battles of the Nile (No. 82), of Copenhagen (No. 83) and Trafalgar (No. 84), and for the two maps of the battle of Waterloo (Nos. 86, 87), taken from the atlas to Alison's 'History of Europe,' I have to thank Messrs. Blackwood.

The map of India in 1804 (No. 54) is taken from one published by the British Government. It is not in the library of the British Museum, but a copy is in the possession of Mr. S. J. Owen, who brought it to my notice, and there is another copy in the library of the House of Commons, from which, by permission of Mr. R. F. D. Palgrave, clerk of the House of Commons, a reduced copy is here given. The system of colouring in the original map is, however, too complicated for school purposes, and I have therefore substituted for it the simpler colouring adopted in other maps of India in this volume. I have, however, retained the references as in the original map, for the sake of those who may not have access to the map as originally published. I have given to the British Museum library the tracing taken for me with the original colouring, so that it may be consulted there by those interested in the matter.

SAMUEL R. GARDINER.
